

1 Calcule les produits.

Pour multiplier un nombre par 100, j'ajoute 2 zéros à la droite du nombre.

$7 \times 1\,000 = \underline{\hspace{2cm}}$

$5 \times 100 = \underline{\hspace{2cm}}$

$9 \times 1\,000 = \underline{\hspace{2cm}}$

$5 \times 1\,000 = \underline{\hspace{2cm}}$

$15 \times 100 = \underline{\hspace{2cm}}$

$742 \times 10 = \underline{\hspace{2cm}}$

$51 \times 100 = 5\,100$

2 Calcule les produits.

$523 \times 10 = \underline{\hspace{2cm}}$

$81 \times 100 = \underline{\hspace{2cm}}$

$4 \times 1\,000 = \underline{\hspace{2cm}}$

$48 \times 10 = \underline{\hspace{2cm}}$

$174 \times 10 = \underline{\hspace{2cm}}$

$38 \times 100 = \underline{\hspace{2cm}}$

$751 \times 10 = \underline{\hspace{2cm}}$

$963 \times 10 = \underline{\hspace{2cm}}$

$4 \times 1\,000 = \underline{\hspace{2cm}}$

3 Complète les égalités.

Regarde bien le nombre de zéros du résultat !

$54 \times \underline{\hspace{1cm}} = 540$

$\underline{\hspace{1cm}} \times 14 = 1\,400$

$19 \times \underline{\hspace{1cm}} = 1\,900$

$569 \times \underline{\hspace{1cm}} = 5\,690$

$25 \times \underline{\hspace{1cm}} = 250$

$60 \times \underline{\hspace{1cm}} = 6\,000$
