

1 Calcule ces opérations.

Je calcule les opérations  
entre les parenthèses  
en premier.

$$(5 \times 2) + 4 = 14$$

$$10 + 4 = 14$$

$$(5 \times 10) + 8 = \underline{\hspace{2cm}}$$

$$5 + (10 \times 8) = \underline{\hspace{2cm}}$$

$$40 - (10 \times 3) = \underline{\hspace{2cm}}$$

$$(50 - 20) + 7 = \underline{\hspace{2cm}}$$

2 Calcule ces opérations.

$$(5 \times 7) + 2 = \underline{\hspace{2cm}}$$

$$(4 \times 5) + 4 = \underline{\hspace{2cm}}$$

$$(30 - 10) + 5 = \underline{\hspace{2cm}}$$

$$50 - (8 \times 5) = \underline{\hspace{2cm}}$$

$$30 + (6 \times 2) = \underline{\hspace{2cm}}$$

$$70 - (10 \times 5) = \underline{\hspace{2cm}}$$

3 Calcule ces opérations.

$$(10 + 2) + (3 \times 2) = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$(4 + 6) + (5 \times 2) = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$(20 + 8) - (4 \times 2) = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$(10 \times 3) + (10 \times 2) = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Attention !  
Calcule en premier  
ce qu'il y a entre  
les parenthèses.
