

1 Calcule ces opérations.

$$(4 \times 5) + 30 = \underline{\hspace{2cm}}$$

$$7 + (10 \times 8) = \underline{\hspace{2cm}}$$

$$(7 \times 10) + 8 = \underline{\hspace{2cm}}$$

$$4 \times (7 + 3) = \underline{\hspace{2cm}}$$

$$(4 + 5) \times 10 = \underline{\hspace{2cm}}$$

$$5 \times (3 + 2) = \underline{\hspace{2cm}}$$

2 Calcule ces opérations.

$$(3 \times 10) + 40 = \underline{\hspace{2cm}}$$

$$(40 - 8) + (4 \times 8) = \underline{\hspace{2cm}}$$

$$100 - (10 \times 2) = \underline{\hspace{2cm}}$$

$$240 - (2 \times 100) = \underline{\hspace{2cm}}$$

$$(5 \times 100) + (4 \times 100) = \underline{\hspace{2cm}}$$

$$(350 + 50) + (3 \times 100) = \underline{\hspace{2cm}}$$

3 Complète les égalités.

$$(10 \times \underline{\hspace{1cm}}) + 7 = 97$$

$$23 + (3 \times \underline{\hspace{1cm}}) = 53$$

$$20 + (4 \times \underline{\hspace{1cm}}) = 28$$

$$(2 \times \underline{\hspace{1cm}}) + 40 = 50$$

$$\underline{\hspace{1cm}} + (5 \times 7) = 45$$

$$(10 \times \underline{\hspace{1cm}}) + (2 \times \underline{\hspace{1cm}}) = 100$$
